

Smart Internship Management System

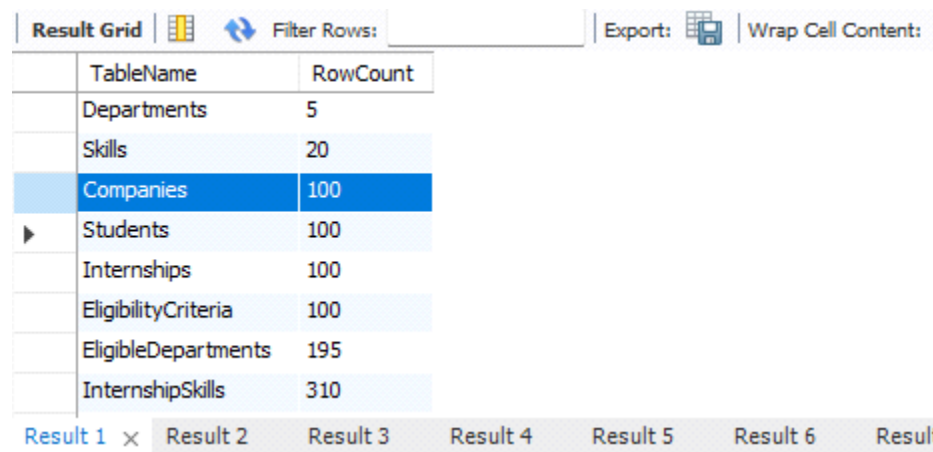

Munazza Sana | Zarmeen Qasim

Milestone 5 — Data Population (DML)

Section 1: Data Loaded Using LOAD DATA INFILE

All 11 CSV files were loaded into the database using LOAD DATA LOCAL INFILE statements. Screenshots of the output are provided below.

V1: Row Count Validation — COUNT(*) for All Tables

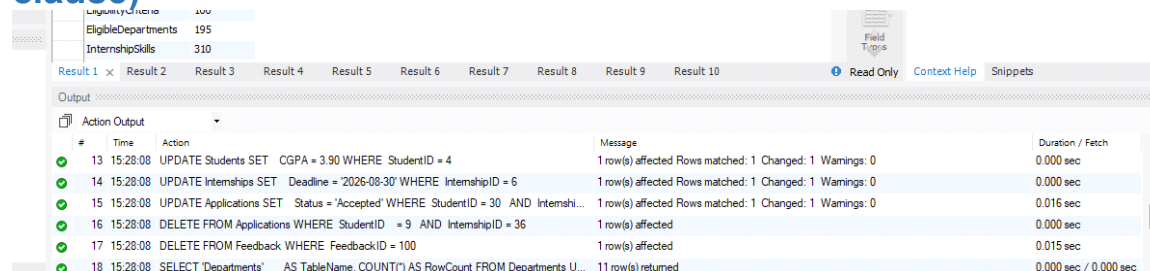

The screenshot shows a database client interface with a 'Result Grid' tab. It displays a table with two columns: 'TableName' and 'RowCount'. The data is as follows:

TableName	RowCount
Departments	5
Skills	20
Companies	100
Students	100
Internships	100
EligibilityCriteria	100
EligibleDepartments	195
InternshipSkills	310

Below the table, there are tabs for 'Result 1' through 'Result 6'. The 'Result 1' tab is selected, and a link 'f Result 1 here]' is visible.

Section 2: UPDATE Operations and DELETE Operations (with WHERE clause)

The screenshot shows a database client interface with a 'Field Topics' tab. It displays a log of database operations. The data is as follows:

#	Time	Action	Message	Duration / Fetch
13	15:28:08	UPDATE Students SET CGPA = 3.90 WHERE StudentID = 4	1 row(s) affected Rows matched: 1 Changed: 1 Warnings: 0	0.000 sec
14	15:28:08	UPDATE Internships SET Deadline = '2026-08-30' WHERE InternshipID = 6	1 row(s) affected Rows matched: 1 Changed: 1 Warnings: 0	0.000 sec
15	15:28:08	UPDATE Applications SET Status = 'Accepted' WHERE StudentID = 30 AND Internshi...	1 row(s) affected Rows matched: 1 Changed: 1 Warnings: 0	0.016 sec
16	15:28:08	DELETE FROM Applications WHERE StudentID = 9 AND InternshipID = 36	1 row(s) affected	0.000 sec
17	15:28:08	DELETE FROM Feedback WHERE FeedbackID = 100	1 row(s) affected	0.015 sec
18	15:28:08	SELECT 'Departments' AS TableName, COUNT(*) AS RowCount FROM Departments U...	11 row(s) returned	0.000 sec / 0.000 sec

Section 4: Validation Queries

V2a: NULL Check — Students Table

Result Grid			Filter Rows:	Export: 	Wrap Cell Content:
